

# Rodent Proofing Cone

Designed by experts For use by professionals

The AF Rodent Proofing Cone is a quick and simple solution to help prevent rodents from gaining access to properties.

The cone can be used on both round and square pipes of various sizes from 50mm to 110mm. It is easily attached to the pipe using cable ties and the cone can be cut to size to create a rodent proof barrier.

### Step One

Slide the cone disk behind the drain pipe / soil vent stack preferably close to a retention bracket. Ensure that the long pre-cut slot is at the top

### Step Four

Adjust and fasten the size of the cone using the supplied cable ties and pre punched holes

### Step Two

Pull the cone forward ensuring that the tabs on the cone remain pointing upwards.

### Step Five

Attach the cone to the drain pipe retention bracket using the supplied cable ties and pre punched holes

### Step Three

For close fitting pipes the cone can be cut to size using a sharp knife or scissors to create a half cone proofing option

### Step Six

Fully fitted cone
