## 1. Main components

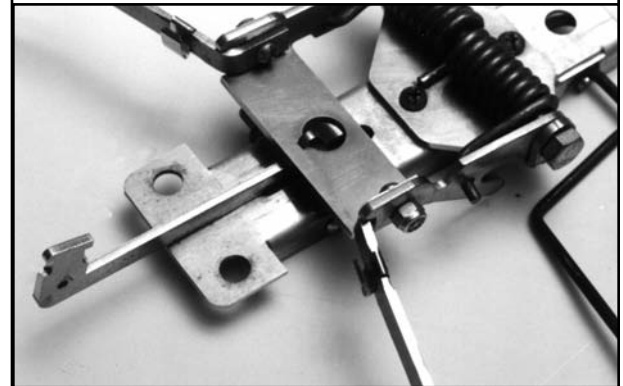

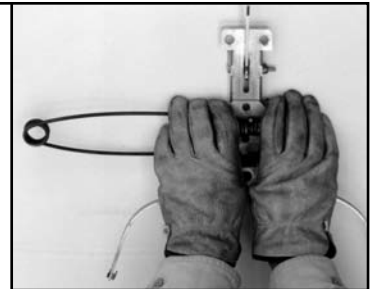

The throw mechanism with cable support arms and trigger; the cinch spring; the capture cable

## 2. Adjust trigger tension

## 3. Attach cinch spring

4. Prepare to cock the throw mechanism: place on hard, flat surface; use your body's weight.

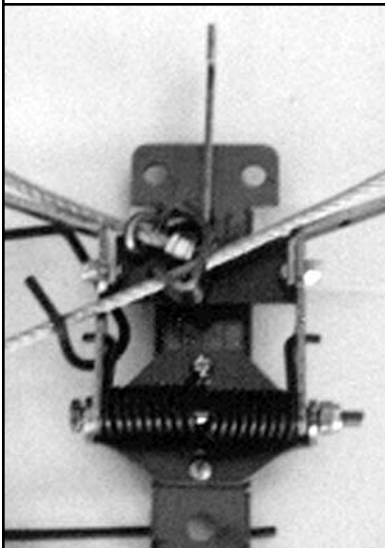

5. Throw mechanism cocked.

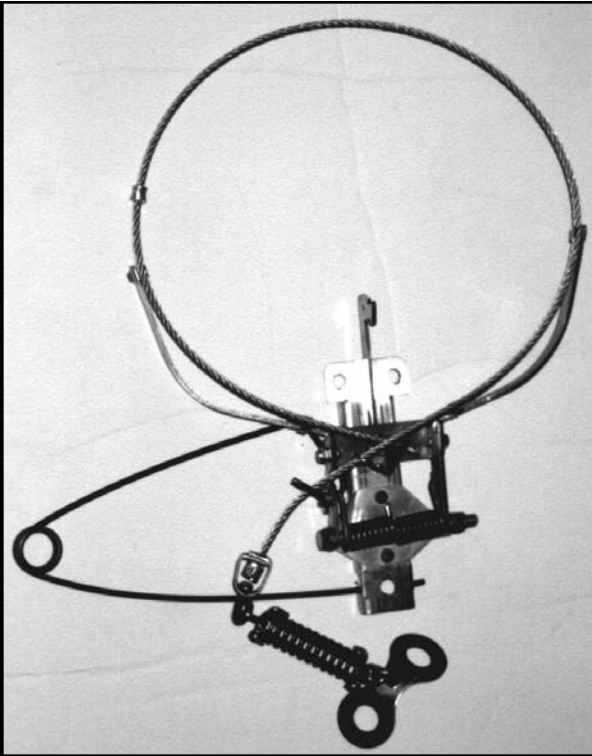

6. Engage the cinch spring

**7.**  
Using gutter spikes, firmly anchor the throw mechanism to the ground

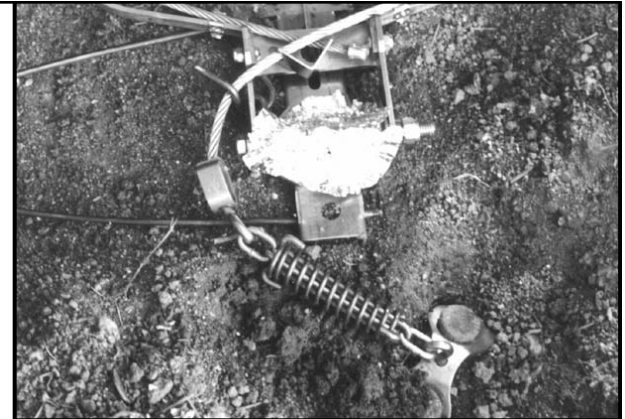

**8.**  
Mount the cable, utilizing the clips on the cable arms, ensuring the cable passes through the groove in the throw arm and under the hook of the cinch spring.

**9.**  
Anchor the cable utilizing the swivelled anchor point

**10.**  
Trap without cinch spring

**11.**  
Cover the springs

**12.**  
Ready for baiting, shows bite-piece where canine "bites and pulls" to activate the device
